Craigiels Community Woodland – Letter of Support

Dumfries & Galloway Woodlands has been established as a response to the twin biodiversity and climate crises, protecting trees, habitats and the people that depend upon them in Scotland's South West.

We write to record our support for the volunteers driving the Craigiels Community Woodlands proposal. Community Acquisition of the site would protect a valuable and visible woodland surrounding the community of Beattock. Nearby critical transport infrastructure increases the visibility further but also increases the ecological need for active biodiversity support and management in the area.

The group is genuinely representative of the local community and we will be offering to assist in any way that we can.

McNabb Laurie

Dumfries & Galloway Woodlands – Manager
