

Large expanse of 11b [Calluna, Eriophorum vaginatum Blanket Bog] on Rothes Estate, hydrologically connected to the existing Blanket Bog on Elchies. Rothes Estate will consider the area for restoration under a future phase but are currently focused on the moss of Rothes as a priority. Dependent on funding options available at the point at which the Rothes III Windfarm footprint becomes their focus, they will then define what is to be put forward for restoration under what schemes.
