

Visitor car park and Glen Doll ranger centre facilities inc. starting point for way marked trails.

Protect and expand montane habitats inc. rare arctic plant species on and around high crags. Artist's illustration below of rocky crags at head of Glen Prosen in 50 years' time vegetated with montane species such as woolly willow and alpine blue sow thistle, Ring Ouzel and Golden Eagle.

Clear wind blow and open up public access; transition to more native woodland in Glen Doll. Artist's impression below of Glen Doll looking north from the Kilbo path into the Glen where timber harvesting of windblow has changed the shape of the plantation and young broadleaf trees are establishing as part of the transition to a more native woodland.

Peatland restoration and drain blocking to create open habitat mosaic and slow the flow of water.

Fire resilience - vegetation control to create fire breaks, potentially grazed to reduce fuel load in open areas.

Open wooded habitat mosaic of heath, peat bog and wet areas and montane scrub, blending into lower elevation native woodland. Artist's impression below of open wooded upland habitat mosaic in the higher elevations of Glen Prosen

Harvest windblow and mature crop - restructure plantation, focus productivity in core area and integrate outer coupes into surrounding landscape.

Future visitor parking and welcome area potential in Glen Prosen.

Planting of alder, birch, willow and aspen alongside watercourses to provide shade to reduce water temperature and improve freshwater habitat. Artist's impression of riparian woodland along the river in 50 years' time.

Temporary visitor parking in layby before bridge for Glen Prosen.

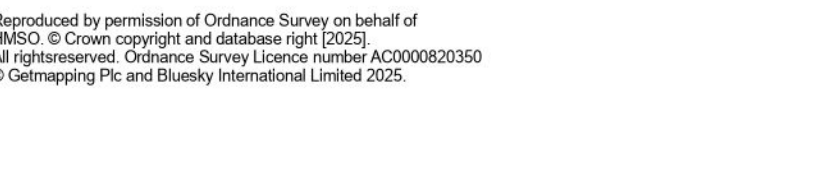

Valley side woodland - planting of birch, Scots pine, aspen, rowan, willow, for example, to create a varied habitat in the lower reaches of the glen, interlocking with surrounding open habitats for waders. Artist's impression (left) of Glen Prosen, looking down the glen from King's seat in 50 years with 'Valley side woodland'

Legend

Montane heath mosaic	Core Paths	Peatland habitat mosaic	Upland Flush Fen & Swamp
Productive conifer plantation	ScotWays Rights of Way	Waders open habitat	National Nature Reserves
Low density open wooded habitat	Forest Roads	Fen, Marsh & Swamp	Montane willow scrub
NRF Fences	Riparian woodland	National Forest & Land Boundary	
Proposed fences	Valley side woodland	Watercourses
