Scotland's national forests and land are responsibly managed to the UK Woodland Assurance Standard.

Retain and manage areas of native broadleaves

Remove windblow Use restock as opportunity to improve diversity and resilience

INNS presence Ensure removal where possible, facilitate continued management if not

Increase percentages of open ground and broadleaved cover and protect desire lines where possible to retain and enhance recreational value

Use restock as opportunity to improve diversity and resilience

Ensure long term management protects key gas and electricity infrastructure

Retain crop to retain structural diversity

Establish riparian woodland along watercourses

Ensure crops are managed to facilitate CCF
