

Summary of Land Management Plan Proposals

Analysis of the available information has led to the **primary objective** for this site being the introduction of a starter farm.

Additional **secondary objectives** for the future management of the site have been identified as:

- Establishing new productive broadleaved woodlands to benefit income diversity for this landholding, to extend habitat networks and to sequester carbon as part of the national climate change mitigation efforts;
- Create a resource that has the potential to be used by, and managed in partnership with, the local community.

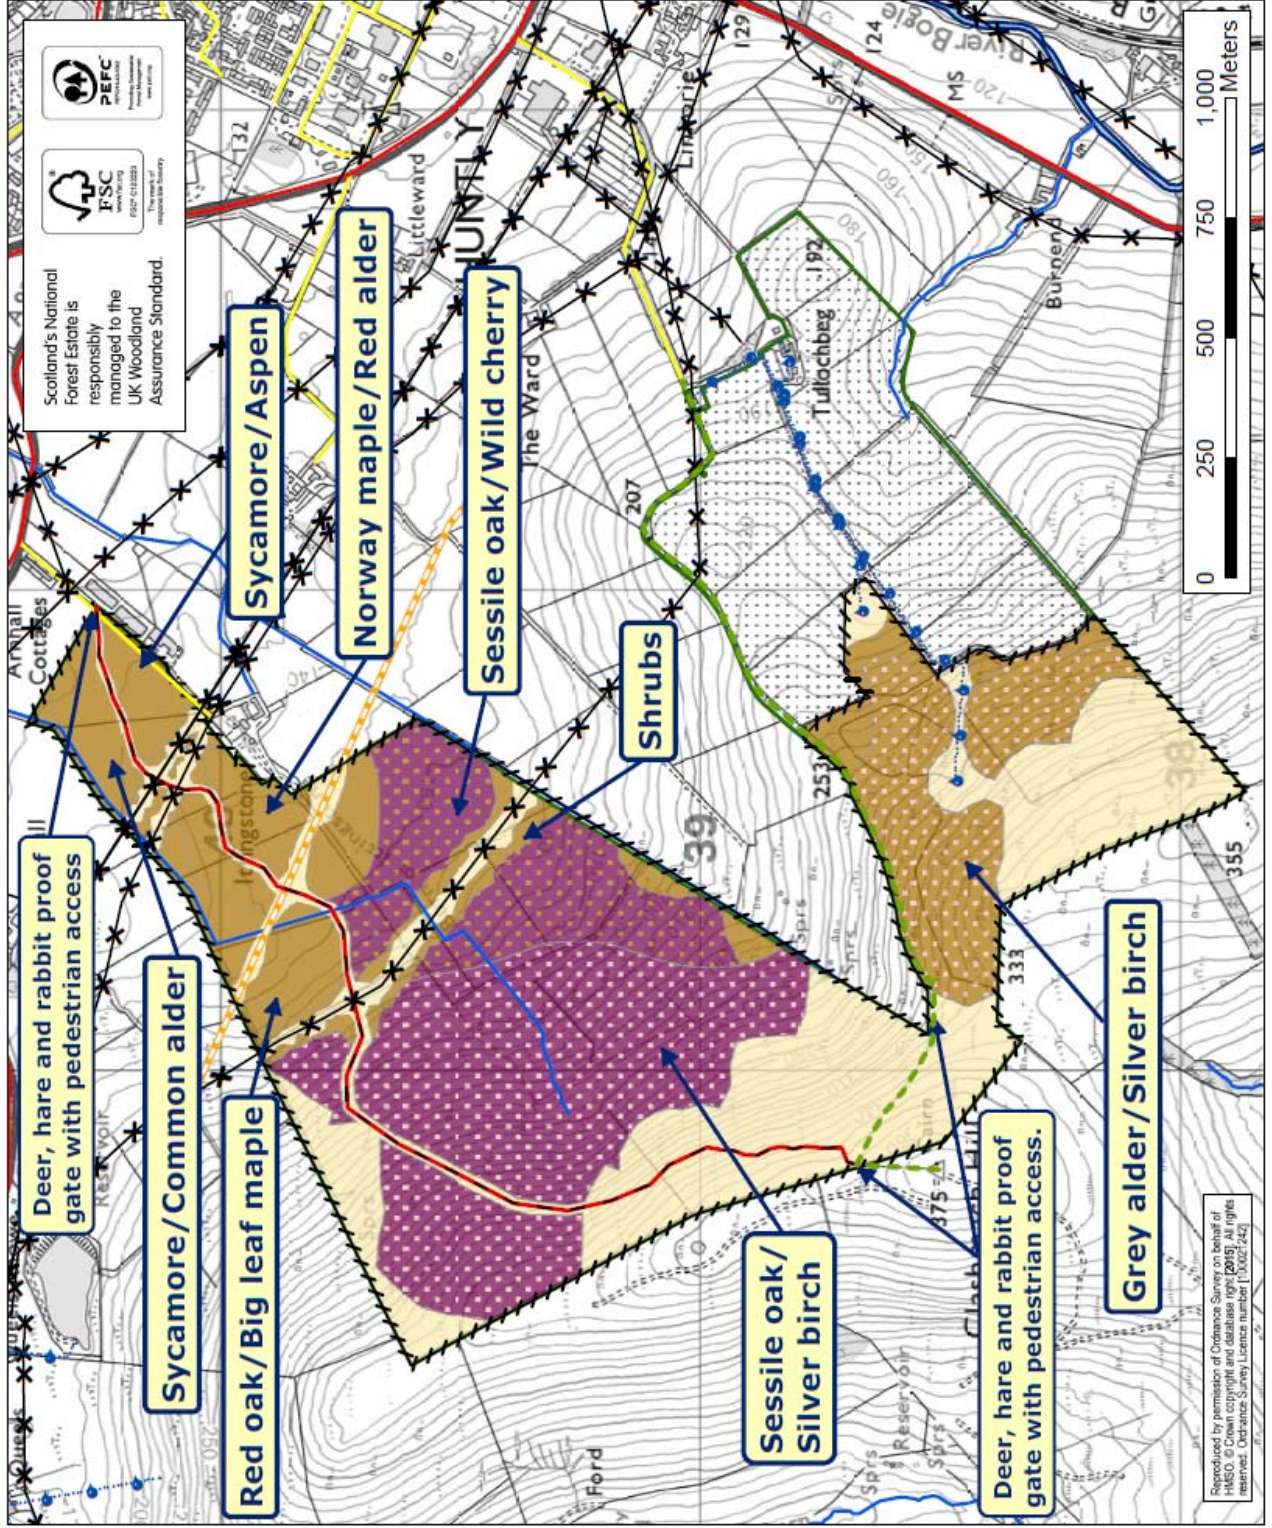

Total plan area	171.5 ha
------------------------	----------

Species breakdown	Area (ha)
Starter farm	46.7
Open land	57.4
Sessile oak	19.5
Silver birch	63.8
Sycamore	10.3
Common alder	10.2
Shrubs (Hawthorn, Blackthorn & Hazel)	10.5

Consultation and Further Information:

For further information on the plan please contact Mark Reeve, Planning Forester, Forestry Commission Scotland on 07990802079 or: mark.reeve@forestry.gsi.gov.uk

Moray & Aberdeenshire Forest District Ittingstone
Future species
O.S. Grid Ref NJ 514390 Scale: 1:10,000 @A3 Date September 2015

- Water supply pipe
- Informal route
- Access track
- Powerline
- Gas pipe
- Deer fence
- Watercourse
- Starter farm
- Open land
- Broadleaved/Birch
- Broadleaved
- Oak/Birch
- Oak/Broadleaved

Scotland's National Forest Estate is responsibly managed to the UK Woodland Assurance Standard.
