

Loch Goil Forest Larch Removal Plan 2025-2030

Text Annotations on Map A – Analysis of Previous Plan

There is a large text box included on Map A which contain some additional explanatory text to compliment what is shown on this map. In the text box the areas felled during the period covered by the previous plan, and the intervening period, are shown by area felled and the circumstances of that felling. This text box refers to the whole map and forest rather than specific forest areas.

To make the map labels accessible to people using screen reading technology, the exact text of each text box is given here:

- This map shows the areas felled (and not felled) during the previous LMP period 2010-2022 and summarised as follows (gross areas):
 - Approved coupes felled 496.85ha
 - Windblow Amendments 65.95ha (2011-12 storms)
 - PR amendments 72.2ha (Phytophthora ramorum)
 - Other Amendments 4.5ha (due to access restrictions)
 - Approved coupes not felled 122.66ha
- Also shown is a suite of Felling Permissions of 67.44ha, put in place to allow ongoing forest management between LMP approval (mainly due to PR SPHNs).
- Proposed new clearfell coupes to be included in the new LMP are also shown for context. These target the removal of Larch spp. in order to comply with current and future SPHNs. There is one windblown coupe in the Lettermay area. For additional context, the areas of Larch spp. and windblow are also shown.
