Objective 2 Design Concept:
Enhance the upper margin by utilising existing open ground & relating margin to landform. Deer control will help to diversify abrupt forest margins by encouraging sporadic diverse regeneration. Review policy on upper margin should neighbouring landuse change.

Objective 4 Design Concept:
Monitor NBL regeneration and SS regeneration along Croe water. Follow UKFS in relation to tributaries to enhance ecological potential.

Objective 1 Design Concept:
Create areas of CCF on targeted areas.

Objective 1 Design Concept:
Create a well designed permanent coupe structure with SS as the primary species.

Objective 3 Design Concept:
Use age class diversity and well designed SS coupes to enhance the landscape.

Objective 3 Design Concept:
Build on the diverse woodland at the glen entrance using diverse conifers and areas of CCF where slope allows.
