

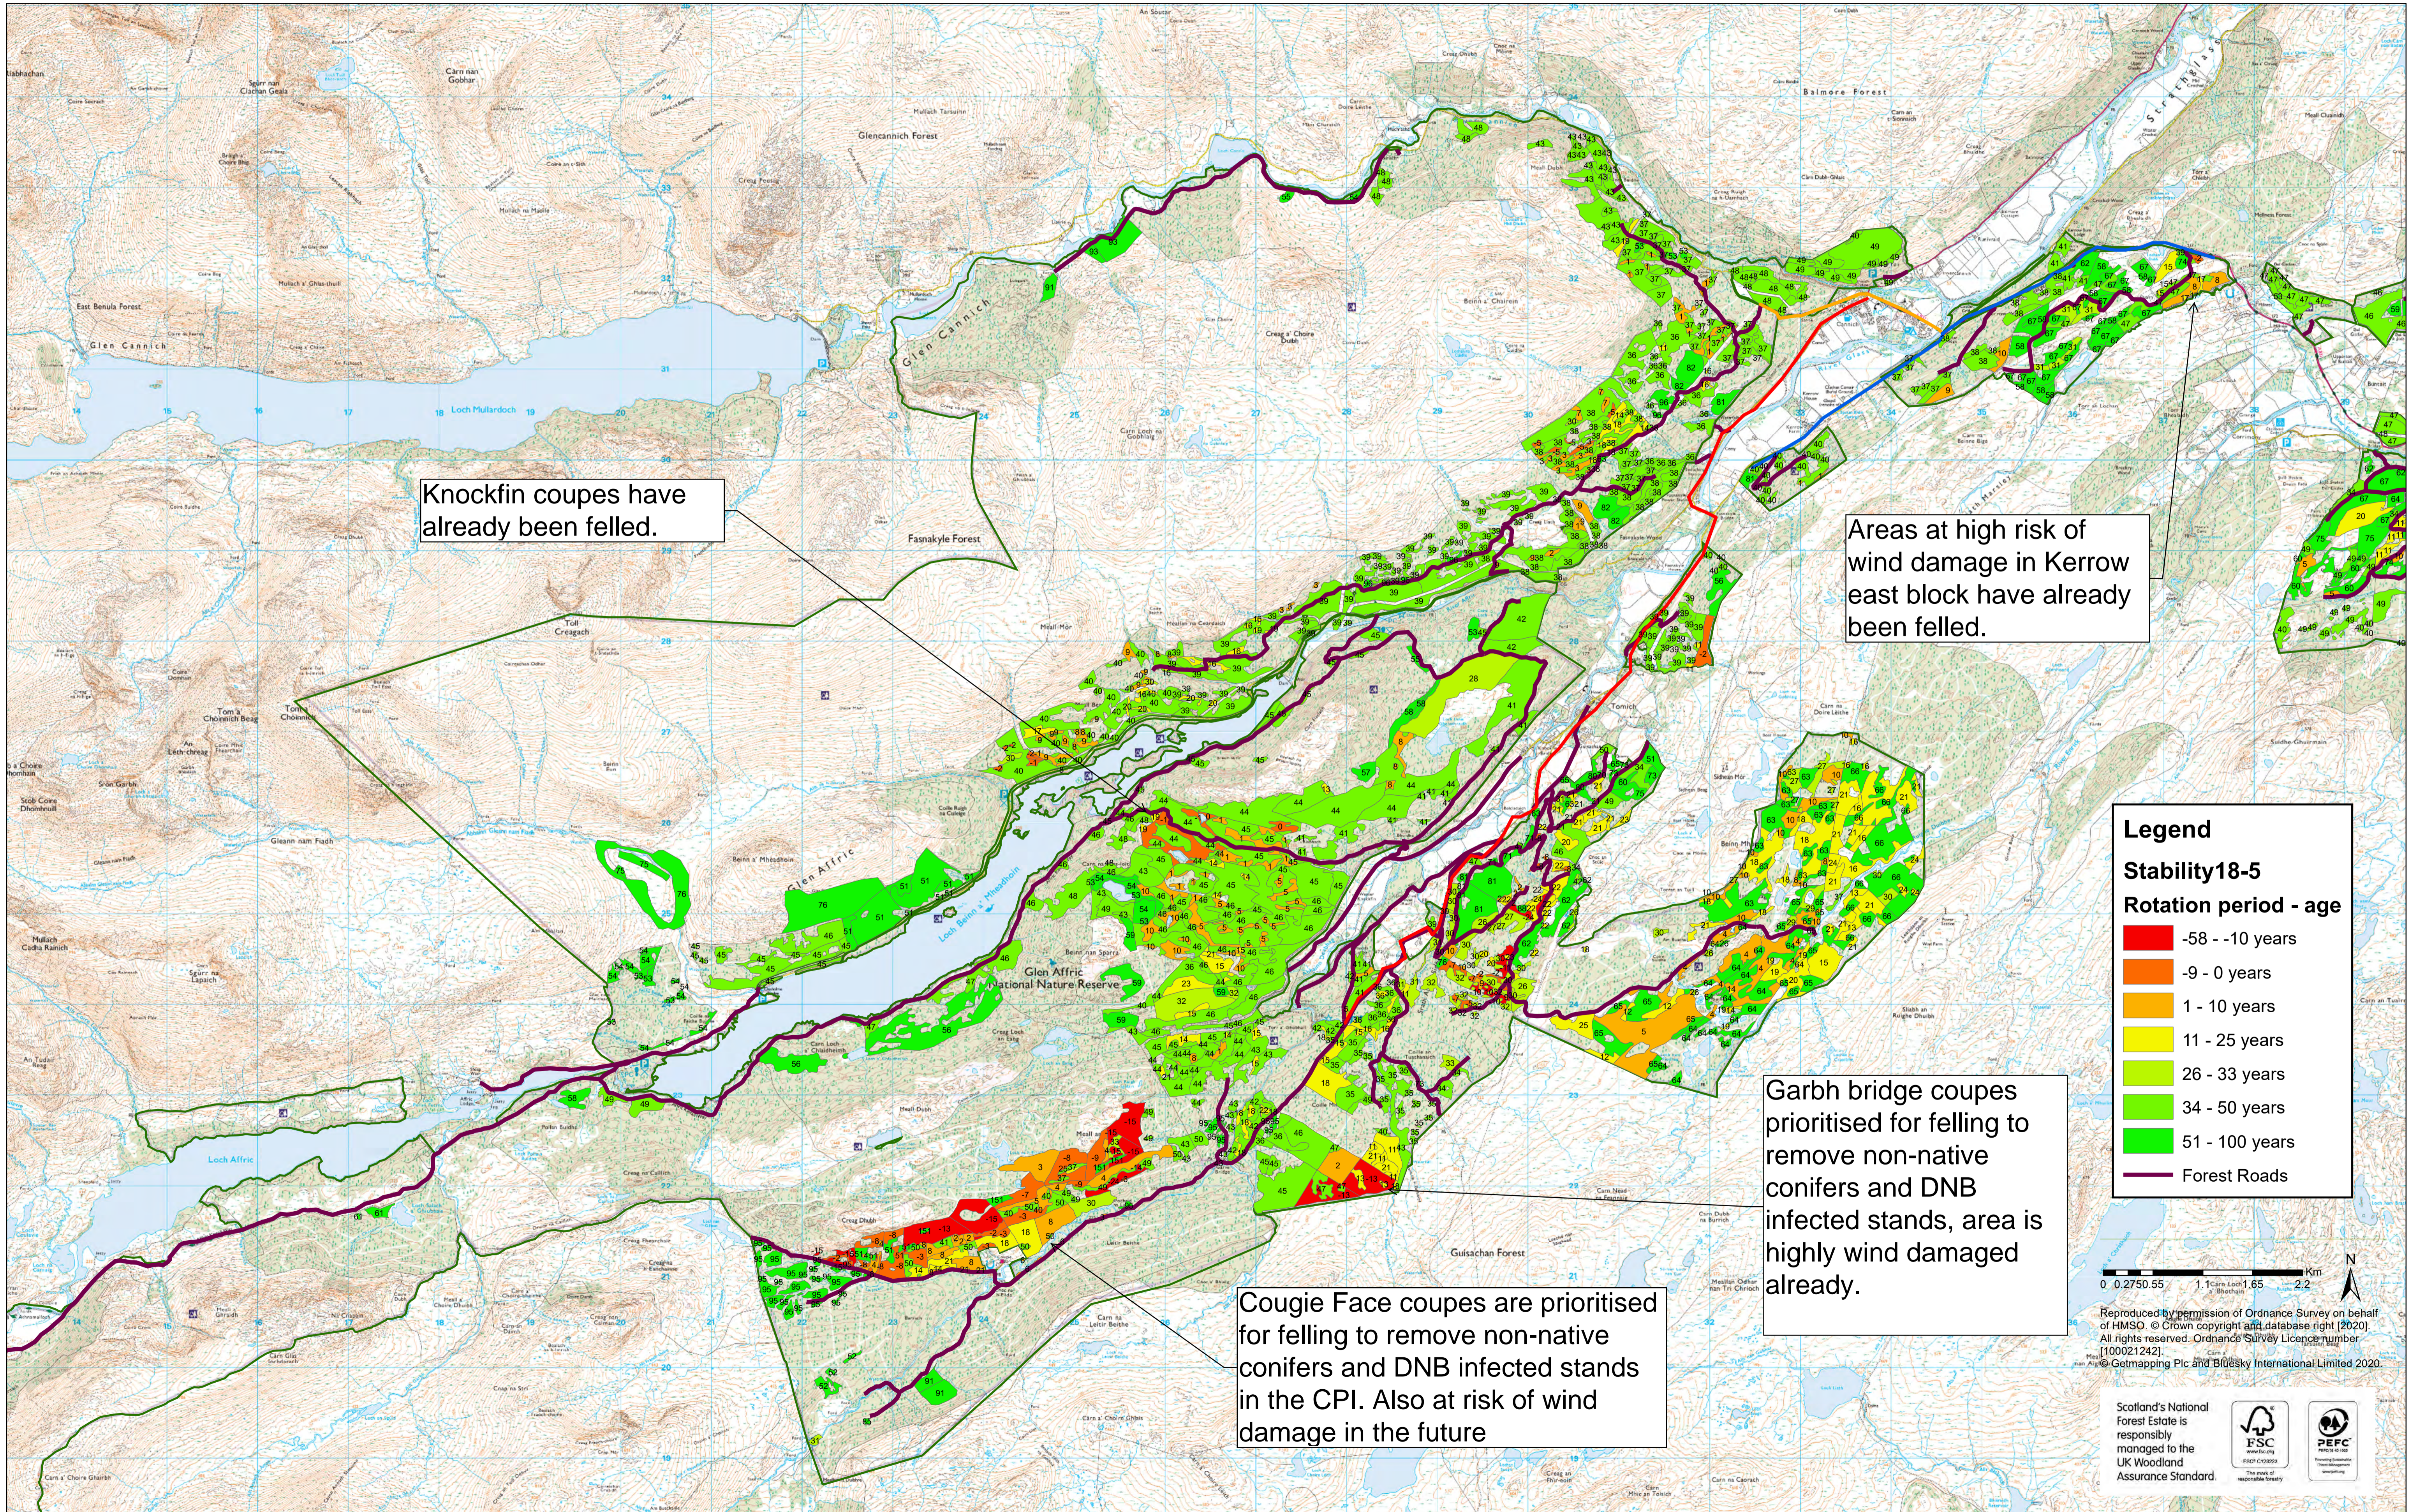

Map 13- Wind Stability

Stability of current stands, colours indicate the number of years until substantial wind damage will be sustained. Indicates which stands should be felled before they suffer too much wind damage and which stands can be delayed from current fell dates.

Knockfin coupes have already been felled.

Areas at high risk of wind damage in Kerrow east block have already been felled.

Garbh bridge coupes prioritised for felling to remove non-native conifers and DNB infected stands, area is highly wind damaged already.

Cougie Face coupes are prioritised for felling to remove non-native conifers and DNB infected stands in the CPI. Also at risk of wind damage in the future
