Strathdon LTP Map 14: Wildfire Risks and Mitigations (1 of 2)

- Properties adjacent to block
- Main Entrance NJ 3910 1162
- Properties adjacent to block.
- Entrance: NJ 3808 0911
- The estate track and watercourse on eastern side act as a good break.
- The forest road network provides good access for fire fighting equipment
- The Bunzeach is largely located downhill of open moorland which helps mitigate the risk of spread from these areas
- The primary external wildfire risk is via spread from moorland. The eastern, southern and western block's boundaries have been identified as moderate to high risk.
- Poor phone reception throughout block.
- Low recreational pressure, with no history of campfires found.
- Entrance: NJ 3507 1129
- Entrance: NJ 3564 1263
- Property adjacent to block.
