

### Appendix XIII: LISS specific coupe prescriptions

Area	Name	Coupe	Area	Current stand	LT objective	Target species	Target age structure	Next intervention
1	Torlundy surrounds	31057	5.7	Mixed spp and ages	Attractive more open woodland in the immediate surround of property and Forest office. Safety	Predominantly native BL with some specimen conifers	Mixed	Prepare a more detailed plan in discussion with local community Remove some of the conifers and thin broadleaves
2	Gleann Domhanaidh North	31057	7.1	Mixed spp and ages	Riparian corridor and recreation route to Nevis Range. Eastern part is adjacent to the Cabin Development. Native woodland, well thinned to allow views through to the Lundy and open woodland along the access route	Predominantly native species with some specimen conifers from first rotation	Mixed	Part thinned in 2016/7. Need to continue the respacing of broadleaves and removal of conifer.
3	Tom na Buaille	31059	12.9	SS P88, P96 Includes some HL	Future recreation area and potential new walk Also part of access to North Face car park	Mixed Predominantly CF. Retain P32 stands	Mixed with more open structure	1st and sub thinning. Clear windblow. Keep P30s stands as LTR
4	North Face access	31000	4.2 (W)	Bi P88 0.6 Native BL P2020 0.4 Open	Access road to the forest and facilities to be well managed and safe. Lower intensity of management compared to access to Nevis range	BL between road and boundary Mixed predominantly CF to east	Mixed. Denser forest rather than more open structure	Replanting with broadleaf around the pylon line to west of road. Thin to east of road favouring mixed woodland development Remove conifer regen from the riparian area
4a	North Face car park	31042	6.7	SS P91 Bi P91 SS/JL P32 40% open	Surrounds of car park and future recreation area	Mixed - retain P32 crop	Mixed	1st thinning and remove windblow by road Keep P30s stands as LTR. Retain larch unless actually infected
5	Tom a' Choich	31081	5.7	P60 BL 5% P37 SS open	Broadleaf – may be option for production (low grade)	Mixed broadleaf	Mixed long term	Thinning
6	Druim Mor	31054	27.4	P2003 SS/EL/NS P2010 SS/EL P2001 SS/HL/LP	Long term potential to create a large area of mature well thinned conifer to be managed through irregular shelterwood system in the future. Sawlogs. Adjacent to Cabin development (See below) and above a key recreation route.	Mixed conifer	Irregular shelterwood	First thin- must be done on time silviculturally. Try to remove Larch component and create more open edges above MacKenzie road.
6a	Border to cabin development on west	31054	8.6ha	P2010 SS/EL P2001 SS/HL/LP	Transition woodland management zone between the Cabin development and the wider forest – in conjunction with the Forest Holidays own woodland management	Mixed conifer and broadleaf	Irregular shelterwood but open structure	First thin the P2010 and P2001 with rest of coupe . Sub thin to be a crown thinning Dialogue with Forest Holidays on management
7 and 8	Cabins	31062 31066	20.6 8.6	P2010 SS/EL P2001 SS/HL/LP P87 SS/HL	Forest holidays have a separate woodland plan for the cabin development site	Mixed Predominantly CF.	Mixed more open structure for cabin setting	Forest holidays responsible for management under their lease
9	Lundy flood plain north	31056	9.9	P92 Bi/SS	Lundy floodplain protection	Predominantly native BL	mixed, natural	Complete remove stands of conifer – link to felling of adjacent coupe
10	Lundy flood plain south	31055	3.5	P90 Bi/SS	Lundy floodplain protection and recreation route	Predominantly native BL	mixed, natural	Complete remove stands of conifer – link to felling of adjacent coupe

Area	Name	Coupe	Area	Current stand	LT objective	Target species	Target age structure	Next intervention
11	Nevis Range Entrance	31063 31083	2.1	P56 SS, JL windblow	Entrance to the forest and facilities	Large well thinned conifers	Single tree selection	Clear fell current stand and restock with mixed firs
11a	Nevis Range access	31000 31101 31102	3.2	Open P95 JL P95 JL/SS/Bi	Access road to the forest and facilities to be welcoming, attractive, well managed and safe.	Mixed conifer and broadleaf with gaps to give view of the mountains	Open grown specimen trees	Continue to thin the current trees with gradual removal of the larch and to under plant with alternative conifers Retain larch until P ram infection or under planted conifers large enough Specimen tree planting where open ground. Encourage Rural centre to landscape their section!
12	High Wire (former)	31077	1.8	P33 SS/SP Mixed BL/CF down slope	Maintain as mature trees	Predominantly conifer by access road and car park BL in the riparian area	Mature conifer for recreation. Natural broadleaves in riparian	Individual tree selection Removal of young conifer from riparian area NB Mature conifers should have priority over riparian area here
13	N of Nevis Range	31085	15.4	P2004 SS/EL	Part of the Nevis Forest Master Plan	Conifer - planted and nat regen	mixed open mature	Thin conifer in next 5 years – need to be on time to allow future management in recreation area.
14	Nevis range	31074	12.0	P86 SS P2001 SS (also contains some BL)	Setting for the Nevis range facilities including the view from the cafe Retain permanent mixed conifer and broadleaf cover giving a more Alpine feel to the setting. Recreation - downhill cycling trails all come through the stand at the end	Mixed Predominantly CF.	Mixed. Open, mature	Might be able to thin some of the stands but small scale. (Favour SP>Firs>NS>SS>LP) Mix with small clearfells replanted immediately with mixed conifers. This will be a challenging site to work due to the concentration of recreation activity but essential we try or there will be no option but eventually to clear fell.
15	Creag Aoil	31087	30.3	P30s, P86, 2001, PFE mixed in groups	Recreation trail setting Sawlog production	Predominantly conifer	Mixed, small groups	Restocking. Fell small groups. Possible thin matrix? Keep ruins of Creag Aoil township open
16	Allt Criche	31139 31156	9.4 4.3	BL, P42 SP, P42 SS/LP, P2000, P2011 SS, P42 HL. P2000 HL	Riparian corridor Road used for rec access	Mixed CF and BL	Mixed. Open, mature	Thinning 1 <sup>st</sup> thin P2000 SS and P2011 Consider thinning P42 crops Removal of larch if SPHN
17	World champion	31025 31022	21.2	P2018 mixed but in pure groups CF & BL	PAWS, Production, Recreation - downhill cycling	As planted - predominantly native	Mixed open mature	Beat up with Scots pine

**MID ROTATION CONIFERS - SMALL COUPE AREAS SOUTH OF THE RIVER LUNDY**

Name		Area	Current stand	LT objective	Desired spp	Age structure	Next intervention
Glenn Domhanaidh south to Puggy line	25 coupes	75.6 total Av 3.0ha Largest 9.3ha	Mid P80s SS with remnants of P30s stands SP. EL	Production Recreation back drop - small scale but not intimate	Predominantly conifer - firs and SP	mixed in small clearfells	Open up first fellings, clear windblow, may be able to do bit more thinning
South of Dornie quarry	5 coupes 31086, 31091- 95	18.4 total Av 3.1ha Largest 5.3ha	P86, some felled and windblow	Recreation backdrop - small scale but not intimate. Visual, sound, dust screening for the quarry	Predominantly conifer - firs and SP	mixed in small clearfells	Open up first fellings, clear windblow, may be able to do bit more thinning
